1990s - till present

Formica® - The Original Inventor of Laminate

For 100 years, the story of the Formica® brand has been one of discovery and innovation. Formica is an iconic brand inextricably linked to the invention of the original High Pressure Laminate (HPL).

Founded by Herbert A. Faber and Daniel J. O'Conor in the year 1913, Formica® has been a forerunner laminates' production worldwide. Before 1913, all laminates were made from the mineral mica. With roots in chemistry and engineering, Faber and Conor stumbled upon a crucial and more economical alternative and soon adopted this method of producing laminates that were strong, light, and excellent electrical insulators. As they became a very good substitute "for" the mineral "mica", the brand was conceptually named "Formica".

Having developed an unrivaled expertise that ensures quality products, Formica® has challenged market norms and set global benchmarks since its inception. Working relentlessly with architects, interior developers and designers, Formica is known for ushering in innovation to strengthen its product base.

www.fbu.com

Formica is a part of Fletcher Building, a publicly traded building materials and construction company with annual revenues of \$8 billion. One of the largest companies in New Zealand, Fletcher Building has five operating divisions: Building Products, International Businesses, Distribution, Residential & Land Development and Construction.

World's largest manufacturer of decorative surfaces and high pressure laminate, Fletcher Building businesses operate across several countries worldwide, from Australasia to the South Pacific, Asia, North and South America, Europe and the Middle East. Fletcher Building includes more than 50 businesses which include construction, cement manufacturing, and steel and building products manufacturing.

Formica® in India

The 'Original Inventor' with 100 years of innovation and excellence.

Formica Group is a part of Fletcher Building Company.
www.fbu.com

State-of-the-art Laminate manufacturing unit at Kalol, Gujarat.

Formica has gained a strong and steady presence in the Indian market. Today, with its chief headquarters in Delhi, Formica controls its colossal and hi-tech manufacturing plant in Kalol, Ahmedabad. The plant meets global manufacturing excellence owing to a brilliant nationwide distribution system along with a team of dedicated partners and team force. Formica excels in its streamlined network of dealers and offices operating all over India.

As we witness an irreversible opening of Indian economy, Formica is back into India to share the advantages of its technological advances with the Indian customer.

As such no other Indian organization is now entitled to use Formica Brand in India or anywhere else in the world. Formica products, whether manufactured in India or at any of its 13 manufacturing facilities spread across North America, Europe and Asia, will henceforth be made available in India through Formica Laminates (India) Pvt. Ltd., reflecting Formica's unequivocal commitment to India.

OUR PRODUCTS

Formica® Laminate

THE ORIGINAL HIGH PRESSURE LAMINATE by FORMICA GROUP

Formica's iconic range of laminates are an admix of fashion and functionality that prove to be of crucial importance to both the architect and the interior decorator. Over the years, our products have become unmistakable tokens of Formica's identity. Today, Formica is the largest producers of High Pressure Laminates. These laminates are manufactured from high-grade raw minerals taking into consideration Indian environmental specifications. A deluge of textures such as the Woods, Metal, Pearlescent and Solids can be found in this segment, all manufactured employing a high level of indigenization to comply with Indian style statements, lifestyles and climate.

Formica® Door Laminates

FOR HIGHLY FUNCTIONAL DOORS by FORMICA GROUP

Formica® Door Laminates make for beautiful and striking interior doors. A suitable option for highly functional doors in commercial areas, hospitals, etc., these laminates add to the charm of all interiors.

Formica® AR+®

HIGHLY RESISTANT TO SCUFF AND ABRASION by FORMICA GROUP

Formica® AR+® is a series of highly glossy laminates created to be twice as strong as traditional gloss. AR+® is extremely scar & mar resistant and offers a long, hassle-free life.

ColorCore+®

SOLID COLOR LAMINATES by FORMICA GROUP

The ColorCore+® segment is a crucial range which offers high-performance along with a consistent color coding throughout. This eliminates dark edge lines often associated with conventional lamination. ColorCore+® is available in selected solid colors in gloss and matte finish.

Formica® Slender Range

WOODS, GLOSSY, TEXTURED AND SOLID RANGES IN 0.8MM by FORMICA GROUP

Formica® Slender Range is a series of slim laminates with a thickness of .8mm. Despite their thinness, these laminates are a proof of durability and superior design. Produced exclusively at Formica® India's factory at Kalol in Gujarat, the Slender Range is an ideal and budget-friendly option for a gamut of interior applications.

Formica® Post Forming Range

FOR ROUNDED SURFACES AND EDGES by FORMICA GROUP

Formica® Post Forming Range, a result of relentless innovation and technical prowess, is made exclusively for curved or rounded surfaces such as corners and edges of tables, benches, boards, etc. The technology that distinguishes this range is its ability to bend and be flexibly installed on rounded surfaces.

Formica® Colors (Solids)

SOLID COLOR LAMINATES by FORMICA GROUP

Enjoy the subtlety of solid color surfaces with Formica® Colors. Suitable for a host of surface applications, the range makes for gorgeous tabletops, benches, cupboards and even doors. Formica® Colors is available in High Pressure Laminate and more.
